

ALL applications and data entry are NOT secure from keyloggers, screen capture and other malware... endpoint threat detection and response solutions are NOT enough.

Protect your employees, suppliers, and clients **NOW**.

SentryBay Armored Client

The final piece of the endpoint security puzzle installed in 3 clicks!

Trusted by banks, governments, healthcare, legal, and corporates globally

If you answer YES to atleast one of the questions below, then please read on:

Do you, your customers, or third party suppliers transact sensitive financial or personal data via a website?

Do you want to protect your brand and prevent financial penalties due to the lack of stringent cyber-security at the endpoint?

Do you use Citrix or VMware or other remote access solutions for desktop and application access from corporate and non-corporate devices?

Do you use Anti-Virus and Endpoint Detection and Response (EDR) solutions that have to monitor, detect and respond to threats?

- ▶ 42% OF ALL ENDPOINTS ARE UNPROTECTED AT ANY GIVEN TIME
- ▶ 70% BREACHES ORIGINATE AT THE ENDPOINT
- ▶ NUMBER 1 RANKED MALWARE IS SPYWARE KEYLOGGERS
- ▶ 230,000 NEW MALWARE IS CREATED EVERYDAY
- ▶ 5 MILLION DATA RECORDS ARE STOLEN EVERY DAY

SENTRYBAY ARMORED CLIENT
The SentryBay Armored Client solves the key security challenges without additional infrastructure, complicated configuration and management.

It provides real time patented protection to applications & data without needing to detect & respond to threats... kernel level prevention of data exfiltration even if the threats exist combined with the secure wrapping of applications and injected security, including customisable secure Armored Client Browser.

Employees, Suppliers, Consultants

Secure Remote Access

Unmanaged/BYO Device

Armored Client provides a more secure way of accessing any corporate remote access system, including Citrix, MS RDS, VMware Horizon or Windows WDI on Azure

Employees

Corporate Applications

Corporate Managed Device

Corporate Apps are targeted on the endpoint and run in a secure session through the Armored Client, protecting from unidentified threats

Employees, Customers

Web Based Apps & SaaS

Corporate or Customer Device

SaaS Internet or Internal Web Apps are accessed by the Armored Client secure Browser.

The secure browser can be locked down to specific URLs matching those services to be accessed

PROTECT YOUR ENDPOINT DEVICES FROM:

KEY LOGGING

SCREEN CAPTURE

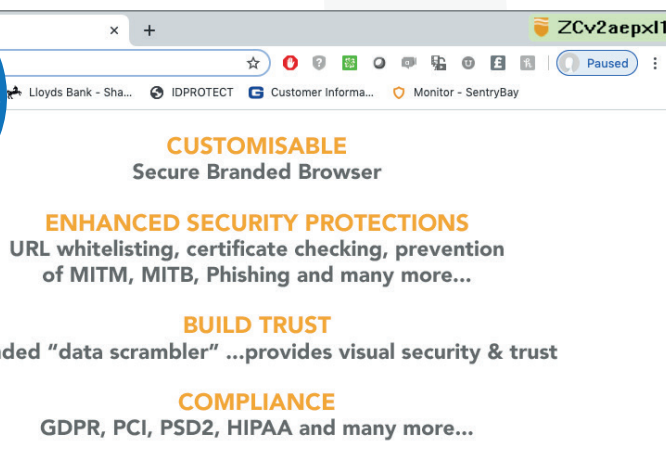

SESSION HIJACKING

OTHER MALWARE

WHILST PROVIDING:

- Protection of logon credentials and the entire session activity
- Protection of sensitive data into local applications eg Office
- Elimination of browser compatibility issues
- Automatic updates
- Ease of deployment and enforcement
- Complements existing security solutions – AV & EDR
- Reduced support and operational costs
- Regulatory Compliance - Mitigate data breaches and potential financial penalties

Armored Client Browser

SentryBay software replaces the actual keystrokes with fake random keys which the keylogger malware receives – displayed as a “data scrambler” to demonstrate the protection provided
